

~~CONFIDENTIAL~~

Technical Accounting Staff

25X1 This Staff develops and installs accounting systems and financial reporting methods and procedures for all components of the Agency and projects. It also makes periodic inspections of Overt and Covert activities for the purpose of coordinating financial matters and installing accounting systems and procedures as required to conform with Agency policy, and assist Agency operating units in the financial phase of project planning.

The difference between this Staff and a Technical Accounting Staff of another Government agency is that this Staff has the added responsibility of devising financial accounting procedures and methods for commercial activities such as proprietary and subsidy projects, together with the preparation of income tax and various other reports required of commercial concerns by Federal and State laws.
